

Instructions

Fingerweaving Instructions

Chevron

Version 1: Set up 24 threads: 6A, 6B, 6C, 6D

Version 2: Set up 24 threads, 2A, 2B, 2C, 12D, 2C, 2B, 2A

Pattern written right-handed. The Left handed are encouraged to adapt as described on page 4.

Part a): Divide the threads equally between your two hands, 12 threads in each hand.

Weave the left set using the closest thread from the right hand as weft.

You now have 13 threads in the left hand, 11 in the right.

Part b): Turn the work over

Divide the work between your 2 hands: 11 left and 13 right.

Weave the new left set using the closest thread from the right hand as weft.

You now have 12 threads in each hand again.

Instructions

Cheat Sheet Cards**If the thread at the right of your piece is a 'down' thread**

then your Cheat Sheet card reads:

12-12

Select an "Up" thread for weft

Start with a Pinch (pick up from the back)

11-13

Select a "Down" thread for weft

Start with a Scissors (put down from the front)

If the thread at the right of your piece is an 'up' thread

then your Cheat Sheet card reads:

12-12

Select a "Down" thread for weft,

Start with a Scissors (put down from the front)

11-13

Select an "Up" thread for weft,

Start with a Pinch (pick up from the back)

Hint:

If you are unsure which side you're on, the 12-12 side or the 11-13 side, here's how to tell:

If the colors are arranged symmetrically, you're ready to work a 12-12 row.

If they are not symmetrical, (one side has more of the edge color than the other side) then work an 11-13 row to even things up.

For the purpose of this hint, in Version 1, consider that colors A&D as the same color, and that B&C are likewise the same colors.

Instructions

Reverse Chevron

Version 1: Set up 24 threads: 6A, 6B, 6C, 6D

Version 2: Set up 24 threads: 2A, 2B, 2C, 12D, 2C, 2B, 2A

Part a): Begin at the right side, weave the first thread over 11 threads, and return the weft to warp position.

Turn the work over.

Part b): Begin at the right side, weave the first thread over 11 threads, and then cross with the weft from part a and then return the weft to warp position.

**Grid legend**

Each square represents one thread.

↘ Select this thread as weft

△ Swap the two wefts at the end of the row.

Note: if the first thread at the edge of your work is an 'up' thread, which you select as weft, then you will begin with a 'pinch' (pick up from the back).

If the first thread at the edge of your work is a 'down' thread, which you select as weft, then you will begin with a 'scissor' (put down).
